

# Course on scRNA-seq Data Analysis

Based on the course by SIB <https://sib-swiss.github.io/single-cell-r-training/>

Swiss Institute of  
Bioinformatics

# Course on scRNA-seq Data Analysis

- Day 1 – Introduction and QC
- Day 2 – Data processing and visualisation
- Day 3 – Annotation and interpretation
- Day 1-3 – Group work

<https://www.elixir-czech.cz/events/course-on-scrna-seq-data-analysis-2025>

Swiss Institute  
of  
Bioinformatics

# Course on scRNA-seq Data Analysis

## Learning outcomes

- Explain the characteristics of the most-used methods to scRNA-seq data
- Perform quality control at different steps of the analysis
- Use dimensionality reduction (PCA, t-SNE, UMAP)
- Apply best practices for translating single cell transcriptomic data into biological knowledge

Swiss Institute  
of  
Bioinformatics

# Course on scRNA-seq Data Analysis

## Learning experiences

- Lectures
- Quiz questions
- Exercises

Swiss Institute

- Google docs
- In person ;-)

# Course on scRNA-seq Data Analysis

Day 1 – Monday – Introduction and QC

9:00 – 9:30 Introduction

9:30 – 10:30 Introduction to scRNA-seq

10:30 – 11:00 Break

11:00 – 12:30 10<sup>x</sup> and Cellranger

12:30 – 13:30 Lunch

13:30 – 15:00 Analysis tools and QC

15:00 – 15:30 Break

15:30 – 17:00 Group work

# Course on scRNA-seq Data Analysis

- Cable connection is preferred  
Eduroam WiFi is preferred  
Free WiFi is an alternative
- AC sockets are below the desks
- Please sign the attendance list ☺
- Any technical difficulties?
- Any specific requirements?

# Introduction round

- Your name
- What do you do?
- Why you join the course
